## NUCLEAR NEWS

Please contact your senators (202-224-3121) concerning the Energy bill containing more than \$4.3 billion for the nuclear power industry. Historically, the nuclear industry has received over \$142 billion in federal subsidies while providing only about 20% of our electricity & 6% of our total energy. Nuclear power plants pose a terrorist security threat, create toxic waste, and increase the risk of the spread of nuclear weapons. Web campaign <http://www.nukeretro.com> NIRS arguments concerning nuclear energy: Nuclear Power is Unnecessary, Nuclear Power is Too Expensive, Nuclear Energy is Too Dangerous, Nuclear Power is Too Polluting(95% of the radioactivity ever generated in the US is contained in the nation's civilian high-level atomic waste), Using Nuclear Power to Address Climate Change Would Exacerbate the Problems. Financial & safety risks so grave that nuclear power is not a solution to address global warming. To sign the Petition for a Sustainable Energy Future <http://www.nirs.org>

On 6/22 Bush visited Calvert Cliffs claiming nuclear energy will save us. We absolutely **do not need NEW NUCLEAR PLANTS**.

Please ask you Rep to oppose development of **bunker buster nuclear weapons**. Info <http://www.fcnl.org/nuclear> FCNL has asked us to write a Letters to the Editor Opposing Bunker Buster Nukes

By a 5-0 vote, the Nuclear Regulatory Commission (NRC) has rejected a rulemaking proposal by its staff that would have permitted radioactive waste to be dumped in municipal landfills, used in roadbeds, & recycled into consumer products. The turnaround was all the more remarkable because the Commissioners themselves had earlier strongly directed staff to prepare the waste deregulation rulemaking.

The U.S. Nuclear Regulatory Commission (NRC) LES's plan to build a uranium enrichment plant in southeastern New Mexico is a setback for the citizens of New Mexico, but Wenonah Hauter, dir. of Public Citizen's Critical Mass Energy & Environment, plans to fight the plan.

Britain's nuclear waste crisis will be postponed for up to 1,000 years in the government-owned British Nuclear Fuels scheme for indefinitely storing the intensely dangerous material in giant "millennium domes" around Britain, leaving generations far in the future to work out what to do with it. (*The Independent* 6/12, 2005) [http://news.independent.co.uk/low\\_res/story.jsp?story=646245&host=3&dir=58](http://news.independent.co.uk/low_res/story.jsp?story=646245&host=3&dir=58)

Radioactive contamination in public areas surrounding the Hanford Nuclear Site in Richland, WA is higher & more widespread than previously thought. Article at <http://www.ens-newswire.com/ens/jun2005/2005-06-15-06.asp>

Idaho National Laboratory is poised to become a hub for plutonium production & space-related nuclear projects. Look for a Dept. of Energy's environmental study evaluating a plan to consolidate plutonium-238 production & manufacture it into batteries used to power NASA space crafts as well as for national security uses like running surveillance equipment in remote locations.

Rep. Cynthia McKinney (D-GA) sent a "Dear Colleague" letter to all members of Congress urging them to join her in an effort to **defund Project Prometheus, the nuclear rocket**.
